

## THE STRUCTURAL SAFETY IMPROVEMENT FOR FPSO HULLS

### ColdShield™ : The only Cold Reinforcement Class-Approved for hull girder strength

Coldshield offers hull structural repairs through COLD WORK techniques allowing to:

-  **Reduce exposure to HSE risks for offshore personnel**  
(>140 saved mandays/10m<sup>2</sup> for COT)
- **Minimize**  **production disruption (no HOT WORKS)**
- and **Better manage POB** (short offshore cycle time yielding to lower risk  )

#### APPLICATION AREAS

Repair & Reinforcement of FPSO hull structures:

- Deck
- Side shell
- Longitudinal or transverse frames
- Crude Oil Tanks
- Sea Water Ballast Tanks

#### BENEFITS

- **No welding** or grinding : safe installation with no downtime
- **Class approved alternative to Crop & Renew**
- **Permanent status - Restores initial structural strength**
- **Extreme durability** even under harsh environment
- **Fast & qualified installation** procedure for all weather conditions
- **Very light footprint** onto existing structure (virtually no stress concentration, no residual stress)

# ColdShield™ Standard Process

1- A prerequisite **Site Survey** is performed.

2- Then, **Engineering** is carried out.

3- Pads **Prefabrication** is performed as per Aerospace standards.

4- Then, the two-step **Offshore Installation Process** is carried out: A qualified **Surface Preparation** is performed prior to the **Vacuum-Assisted Injection** of the structural polymer (epoxy resin).

5- Finally, specific **NDT** are used for **Structural Monitoring**.

## ColdShield™ features

ColdShield™ is designed to **permanently restore weakened/corroded structures to their initial capacity** and to protect durably the damaged area against further **corrosion**.

ColdShield™ is a unique and patented technology leveraging vacuum-assisted resin injection in a fully controlled manner even in harsh conditions like an **Offshore environment**.

This technology is based on the proven techniques of bonded composite reinforcement already used in **demanding industries** such as aerospace, military and civil engineering.

ColdShield™ has been developed in a partnership with

and

## COLD PAD®

Our ambition is to be acknowledged as the leading strategic partner for safe, reliable & durable solutions when structural bonding is at stake in harsh industrial environments.

COLD PAD provides innovative solutions designed to enhance the reliability of structural bonding for the **Offshore industry and especially FPSOs** (maintenance and life extension). This includes corrosion-induced issues like plate thinning, fastening and fatigue life extension.
